Cloud Service & Maintenance

The cloud service solution is ideal for virtual management and added flexibility of one or multiple cashers.

Adding this component to the system enables you to access the full potential of your Point Of Sale.

The service also allows you to manage your inventory and staff remotely.

Best for:

- Multiple Cashers
- eCommerce integration
- Remote management
- Virtual checkouts
- Web based solutions

Cloud Requirements:

- Stable internet connection
- (Optional) Merchant account for Credit Card processing such as PayPal or WiPay.

Technical Support

Our technical support team work around the clock to resolve any technical issues you may encounter.

Ask about our Website and Mobile App services for added value.
